Flinders Christian Community College is committed to ensuring the highest standards of care, safety and welfare for its students. The College is also committed to providing a safe and healthy working environment for its employees and contract workers as well as visitors to our school sites. The College recognises that in all its activities it has a duty of care to identify, assess and control risks so that the possibility of harm is minimised or eliminated.

The purpose of the bushfire preparedness policy is to detail procedures and management tasks so that the College minimises risks and is in a suitable state of preparedness for any fire related event. The policy should also nominate key personnel and areas of responsibility should the school emergency management plan be enacted due to bushfire.

Emergency Management Plan

Each campus of Flinders Christian Community College must maintain an Emergency Management Plan (EMP). The EMP applies to all staff, students, visitors, contractors and volunteers at the appropriate campus. The purpose of the EMP is to detail the roles, responsibilities and procedures to undertake in the event of any emergency, including bushfire.

The Campus Principal will be responsible for:

- Ensuring that the EMP is reviewed at least annually and immediately after any significant incident. An Emergency Management Committee (EMC) should be established for this purpose and its office bearers and duties detailed in the EMP.
- Ensuring that the EMP includes policies and procedures for the planning and approval of offsite activities which consider the risk of bushfire in the activity vicinity.
- Cancelling or recalling at short notice if necessary any activity or excursion that occurs on a day of extreme fire danger or total fire ban. Where excursions are not cancelled, special fire safety precautions will be required.
All Staff will be responsible for:

- Ensuring they are familiar with their campus Emergency Management Plan and their responsibilities within it, including the procedures for bushfire response.

All Teaching Staff will be responsible for:

- Ensuring they are familiar with emergency procedures for each excursion they participate in and in particular, emergency procedures pertaining to campsites. Emergency procedures should be explained to students as soon as practical after arrival at campsites.
- Planning to cover arrangements if an excursion needs to be cancelled or recalled because of bushfire threat.

Evacuation Drills

Regular emergency drills should be conducted at least once per term and at different times of the school day and with different emergency scenarios. The purpose of emergency drills is to:

- Familiarise staff and students with emergency procedures
- Identify weaknesses in the management of the evacuation procedures
- Assist staff and students to respond appropriately in an emergency
- Equip staff to be sufficiently flexible to manage a range of different emergencies

The Campus Principal will be responsible for:

- Ensuring the practise of evacuation procedures and drills each school term and at least once per term during the October - April bushfire season
- Ensuring all staff and all students regularly practice using the onsite refuge during drills and moving to it from a number of areas around the school
- Providing information on the bushfire preparedness policy and procedures to staff (including relief staff)
- Providing information on bushfire preparedness to parents and guardians and issuing reminders of procedures during the Oct - April bushfire season.
- Maintaining notices of bushfire evacuation procedures and bushfire emergency contact numbers and locating them appropriately around the school.
- Ensuring training of staff with specific roles and responsibilities in preparing for, monitoring and executing emergency bushfire procedures, including the effective operation of relevant emergency equipment.

All Staff will be responsible for:
• Ensuring they participate fully in all drills when conducted on their campus
• Undertaking training provided by the school for any specific roles they have as part of the emergency management plan

**Site Preparedness**

Each campus of Flinders Christian Community College must regularly manage materials that may easily be ignited around buildings and facilities.

**All Maintenance staff will be responsible for:**

• Completing a schedule of works in Oct and January of each school year to monitor and remove materials that may be regarded as bushfire hazards. This would include branches overhanging buildings, debris and rubbish around and under buildings including gutters and dry grass and vegetation.

**All Staff will be responsible for:**

• Ensuring all flammable materials within their area of responsibility are identified on the campus chemical register and arranging for appropriate storage in flammable resistant cabinets

Ensuring all buildings exits are continuously kept clear of obstructions. Staff should cooperate to maintain integrity of classroom and office exit points at all times.

**Immediate Bushfire Threat**

In the case of a bushfire threatening a campus during a day of normal school attendance, where evacuation of all those on the school site in one trip cannot be performed, the Emergency Management Plan Bushfire Procedures will be enacted.

Each campus will have an on-site bushfire refuge nominated in their Emergency Management Plan.

Any on-site refuge needs to have the bushfire attack level (BAL) assessed and a vegetation management plan and asset protection zone nominated and maintained. In addition to this, any on site refuge must have access to
emergency equipment, first aid supplies, communication systems, water and toilets. Emergency drills should include evacuation to this refuge from a number of areas around the school.

First aid materials and medical equipment are the responsibility of the first aid officer/nurse per campus and communication systems must be maintained by Technology and Information (T&I) department.

**Operation Managers (Carrum Downs and Traralgon campuses) and Property Manager (Tyabb) are responsible for:**

- Maintaining a register updated at least once per school term during the October-April bushfire season of bushfire emergency equipment and ensuring it is in working order.

(An updated register of bushfire emergency equipment, in working order, should include water supplies and equipment, fire hydrants, hose reels and extinguishers, sprinkler systems, alarms, fire blankets.) This information is supported within the Essential Services records per campus.

- Ensuring that there is appropriate access to facilities and grounds for emergency vehicles.

- Ensuring all assembly points designated on the Emergency Management Plan have appropriate access to emergency equipment.

**Bush Fire at Risk Register (BARR)**

In addition to the requirements of this policy, schools listed on the Department of Education and Early Childhood Development (DEECD) Bushfire at Risk Register (BARR) must have in place a number of further procedures and processes. Schools and education and care services considered to be at greatest risk of bushfire have been included on the DEECD Bushfire At-Risk Register and informed of their status on the register. The Carrum Downs campus of the College is listed on the BARR and must develop and maintain systems that show evidence of compliance with all requirements.

**Closure of School on Code Red Days**

Schools and education and care services identified as being at the greatest risk of bushfire and listed on the Bushfire At Risk Register will be pre-emptively closed on days determined by the Emergency Management Commissioner as having a Code Red Fire Danger Rating for their district. This closure includes
exclusion of all persons - staff, students, contractors and visitors - from the College property.
The decision to pre-emptively close schools and education and care services is made by the Department of Education and Early Childhood Development, not the College and is based on a Code Red Day being determined by the Emergency Management Commissioner. Further information about planned closure days can be found on the DEECD website: http://www.education.vic.gov.au/about/programs/health/Pages/bushfirerisk.aspx
It is intended that families will be provided with as much notice as possible of a planned closure. However, if unexpected weather patterns are experienced, closures may happen at short notice. The final decision to close a school or education and care service will be confirmed by the Emergency Management Commissioner no later than 1.00pm the day before the planned closure and will remain in force despite any subsequent change to weather conditions.

The Campus Principal will be responsible for:

- Directly advising parents and guardians of any planned closure as soon as possible and at least prior to the planned closure day. Information will also be published on the Flinders College website.
- Directly advising staff of any planned closure as soon as possible and at least prior to the planned closure day.

Staff will be responsible for:

- Advising any visitors or contractors known to them and normally expected on site on the day of a planned closure, as soon as possible.

Consultation with Local Authorities

Schools listed on the bushfire at risk register must consult local agencies where relevant on their bushfire preparedness and comply with local bushfire regulation of buildings, facilities and grounds. A record of annual visitation or consultation should be maintained.

Parents and Guardians are responsible for:

- Providing the college with up to date emergency contacts and keeping them current throughout the year
- Informing the College of any student absence on the morning of that absence prior to the commencement of the school day or in advance of an absence where possible. In the event of an extreme fire danger day,
parents and caregivers may make an informed choice to keep students at home. The school needs to be notified of this decision as per the normal absence notification.

- Formulating their own family bushfire survival plan and informing the school if their plan includes picking students up from school during the school day and advising who will be responsible for picking up students
- Making alternate care arrangements for their children in the event of a planned Code Red Day closure. No child should be left at home alone or under the supervision of older children.
